SUMMARY

Senior Technical Program Manager with 9+ years of experience leading cross-functional programs in AI, intelligent automation, and enterprise systems from concept to production. Proven track record translating complex requirements into scalable solutions that improve execution speed, reduce costs, and enable better decision-making.

CORE SKILLS

- **Technical Program Management:** Cross-functional leadership • AI program execution • Roadmap & release planning • Risk & dependency management • Agile/Scrum (Jira, Confluence) • Executive communication
- **AI / Agentic Systems:** Agentic workflows • AI orchestration • LLM-assisted systems • RAG pipelines • Workflow automation • Evaluation & validation frameworks
- **Data & Systems:** Python • SQL • Postgres • Vector DB (pgvector) • Data pipelines • System integrations (SSO, CRM, APIs)
- **Analytics & Execution:** KPI design • Program dashboards (Power BI) • Data-driven decision-making • Process optimization

PROFESSIONAL EXPERIENCE

Technical Program Manager — Nextpower LLC. *Fremont, CA | July 2021 – Present*

- Led end-to-end delivery of **AI-driven agentic workflows**, deploying **8+ intelligent agents** across procurement, documentation, and operations using an AI orchestration platform—driving measurable cycle-time reduction and automation at scale
- Program-managed development of a **Retrieval-Augmented Generation** (RAG) system, building enterprise search capabilities using Python pipelines, vector databases (pgvector), and SQL-based retrieval, enabling faster, data-driven decision-making
- Led delivery of an **AI-powered CLM platform**, embedding **LLM-assisted redlining**, **workflow automation, and decision playbooks** to reduce contract turnaround from 2 weeks to 4 days
- Led end-to-end delivery of ProCo, establishing a UAE-based procurement entity through solution design, cross-functional planning, and development across enterprise platforms, delivering **automated intercompany workflows** and $6–8M annual tax optimization
- Delivered end-to-end Procure-to-Pay transformation, reducing vendor onboarding from 47 to 13 days and deploying a scalable bill-capture solution that reduced past-due invoices
- Rescued failing Anaplan system, resolving 250+ backlog issues and improving user sentiment from –30 NPS to +7 within 6 months through structured program execution and cross-functional alignment
- Built and deployed automation solutions (RPA, Power Automate), saving 6 FTE annually and 260+ hours/month across supply chain operations
- Developed executive dashboards and KPI frameworks (Power BI), enabling real-time visibility and data-driven decision-making

Indirect Procurement Manager — Nextpower LLC *Fremont, CA | Aug 2020 – June 2021*

- Led vendor negotiations and procurement strategy, delivering 24% cost savings and improving working capital through extended payment terms
- Scaled procurement operations using data-driven category management and cost modeling

MBA Intern — Growth Strategy & Operations *Electrical Test Instruments | 2019*

- Reduced manufacturing lead time by 25% through supply chain optimization
- Built profitability models that improved margins by 8%

Deputy Manager — Project Manager (Electrical & Instrumentation) *Lafarge | 2013 – 2018*

- Led large-scale PLC/SCADA modernization programs, improving plant reliability from 95% → 98%
- Improved system stability by reducing avoidable shutdowns by 33% through control system and coordination enhancements
- Delivered digital transformation initiatives including predictive maintenance and analog-to-digital control migration, saving up to $2M annually

EDUCATION

MBA – Georgetown University, McDonough School of Business *Washington, DC | 2018 – 2020*
B.Tech. – National Institute of Technology *Nagpur, India | 2009 – 2013*
