SENIOR TECHNICAL PROGRAM MANAGER | SUPPLY CHAIN & OPERATIONS TRANSFORMATION | INFRASTRUCTURE PROGRAM DELIVERY

SUMMARY

Senior Technical Program Manager with 11+ years leading large-scale supply chain, operations, and infrastructure transformation across industrial and enterprise environments. Drives planning, requirements, roadmaps, risk, and delivery cadence for concurrent technical programs — partnering with engineering, operations, and business leaders to reengineer processes and ship quality solutions at speed. Track record spanning multi-entity intercompany and procurement transformation (~\$6–8M annual tax optimization), a critical-platform turnaround (NPS –30 → +7), and end-to-end commissioning of PLC/SCADA and high-voltage electrical infrastructure in 24×7 operations (plant reliability 95% → 98%). MBA (Georgetown), PMP, with hands-on data analytics (SQL, Power BI) and AI/ML-assisted workflows.

CORE SKILLS

Supply Chain & Operations: Procure-to-Pay • Supplier & Vendor Management • Category Management • Cost Modeling • Intercompany & Inventory Workflows • Indirect Procurement • Process Reengineering

Program & Project Management: Agile / Scrum (Jira, Confluence) • Roadmaps & Milestones • Scope & Success Criteria • Risk & Dependency Management • Requirements & Business Use Cases • Executive Reviews & Cadence • Cross-Functional Leadership

Infrastructure & Systems: PLC / SCADA • Electrical & Power Infrastructure • Commissioning • 24×7 Operations • Condition Monitoring & Predictive Maintenance • Enterprise Platforms (NetSuite, Anaplan, Workday, Coupa, G-Treasury) • ERP / System Integrations

Data & Analytics: SQL • Power BI • Tableau • KPI Design • Predictive Modeling • Data-Driven Decision Making

Automation & AI / ML: RPA (UiPath, Power Automate) • Python Data Pipelines • Retrieval-Augmented Generation (RAG) • LLM-Assisted Workflows

PROFESSIONAL EXPERIENCE

Technical Program Manager • Nextpower LLC • Fremont, CA

Jul 2021 – Present

- Led the ProCo finance, procurement, and supply chain transformation across NetSuite, Anaplan, Workday, Coupa, and G-Treasury — designing intercompany sales/purchase-order, inventory, approval, and accounting workflows across 5 legal entities and enabling ~\$6–8M in annual tax optimization.
- Delivered a procure-to-pay transformation reaching an 80% invoice scan rate and reducing vendor onboarding from 47 to 13 days (70% faster); automated supply-chain workflows and built governed executive Power BI dashboards (indirect spend, AP, cash-flow, tax credits), saving 6 FTEs annually and 260 employee-hours/month.
- Rescued an underperforming Anaplan planning platform by triaging 250+ backlog issues, realigning Supply Chain and Operations stakeholders, and launching 4 major initiatives — improving user sentiment from –30 to +7 NPS within 6 months.
- Led concurrent transformation programs spanning Supply Chain, Procurement, Finance, Legal, IT, and Engineering — defining scope and success criteria, building roadmaps and milestones, and managing cross-functional dependencies, risks, and executive decisions in an Agile cadence (Jira, Confluence).
- Drove end-to-end delivery of an enterprise contract lifecycle management (CLM) platform across Legal, Sales, Supply Chain, and Engineering — defining workflows, integrations (SSO, CRM, e-signature), migration strategy, and launch readiness — cutting contract turnaround from two weeks to four days.
- Program-managed AI/ML and automation initiatives — a Retrieval-Augmented Generation enterprise search platform and 8+ AI agents across indirect-procurement sourcing, documentation, and compensation workflows — owning requirements, evaluation/validation, and deployment to drive measurable cycle-time reduction.

Indirect Procurement Manager • Nextpower LLC • Fremont, CA

Aug 2020 – Jun 2021

- Negotiated vendor contracts, extending payment terms from Net 30 to Net 75 and delivering 24% cost savings; scaled procurement through category management and cost modeling to support rapid business growth.
- Partnered with Finance and Operations on supplier strategy, budget controls, and process improvements to strengthen operating discipline during a high-growth period.

Growth Strategy & Operations Intern (MBA) • ETI Precision • Baltimore, MD

May 2019 – Aug 2019

- Built a profitability model and supply-chain improvement roadmap that lifted bottom-line margins 8% and reduced manufacturing lead time 25%.

Technical Project Manager (E&I) • Lafarge • Raipur, India

Aug 2013 – Jul 2018

- Program-managed PLC/SCADA modernization and electrical-infrastructure upgrades end-to-end across a 24x7 operation — coordinating engineering, operations, maintenance, vendors, budgets, and commissioning — raising plant reliability from 95% to 98%.
- Led an analog-to-digital control-system migration across cooling systems, building the business case and delivering a solution that generated ~\$2M in annual savings.
- Integrated energy-management systems across 132kV substations and improved relay coordination — mitigating harmonic distortion, lifting power factor (~\$320K annual savings), and reducing avoidable shutdowns 33%; introduced condition-monitoring (SFRA, Tan Delta) for predictive maintenance and quality assurance.

EDUCATION & CERTIFICATIONS

MBA — Georgetown University, McDonough School of Business

Washington, DC | 2018 – 2020

B.E. — National Institute of Technology

Nagpur, India | 2009 – 2013

Certifications: PMP • Negotiations & Influence (UC Berkeley)
